

FourBrick Technology OPC Pvt. Ltd.

Personalized Innovative services

Portfolio

ISO - 9001 - 2015 (QMS)
ISO - 27001 - 2013 (ISMS)

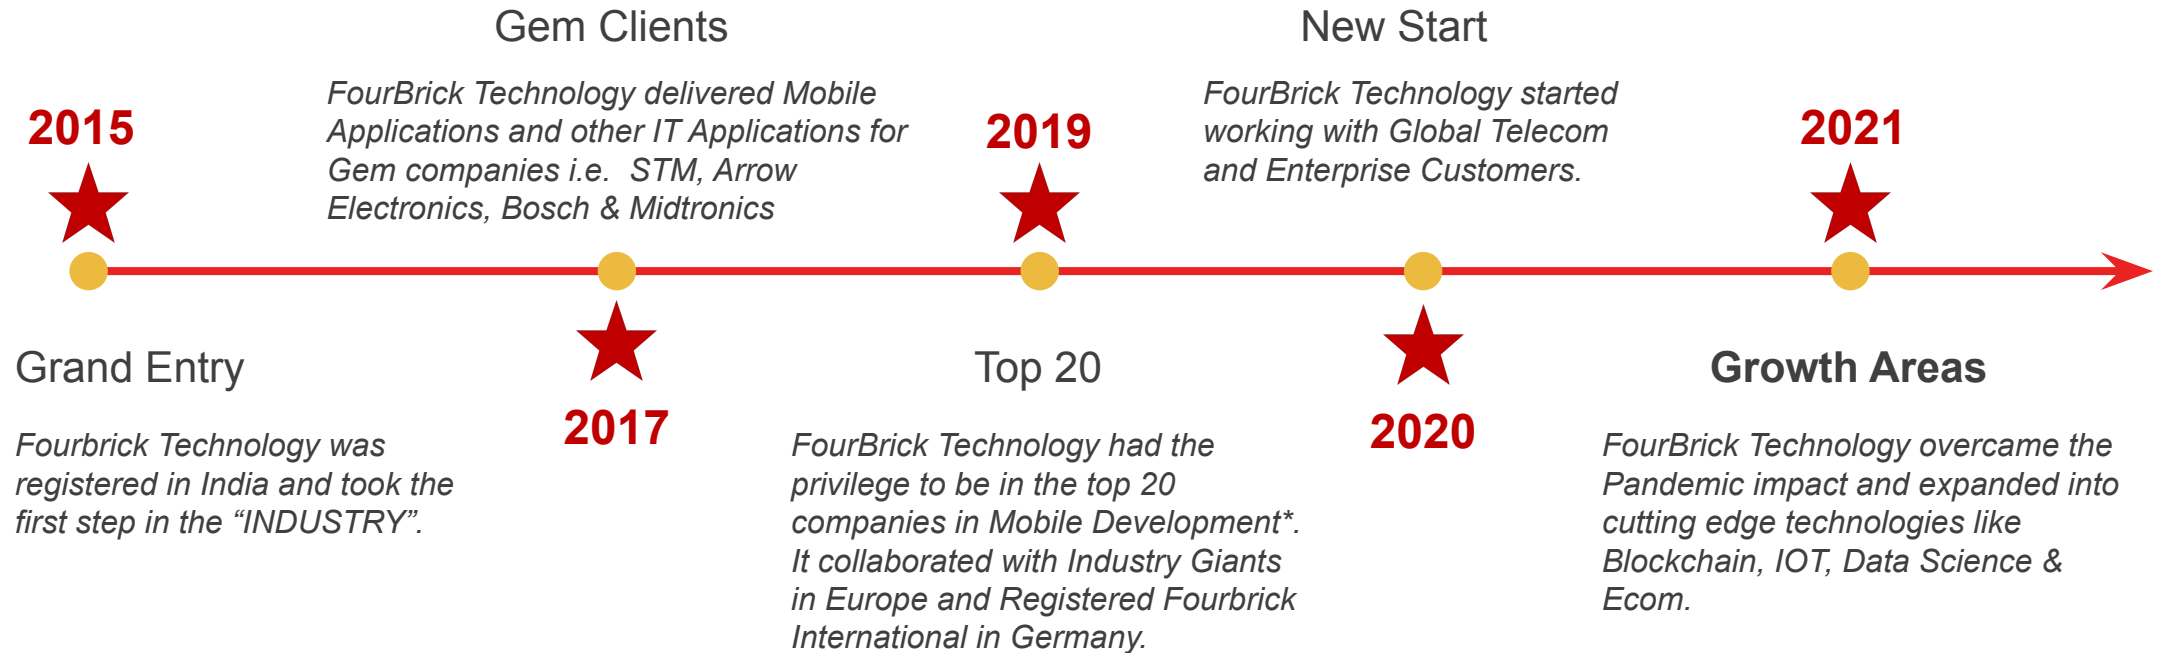

Company History

Fourbrick Technology OPC Pvt Ltd
was formed in Delhi NCR, India in
Year - 2015

Fourbrick International was
registered in Luxembourg in
Lahntal Str. 15 80995 Munich
Munich, Bavaria Germany 80995
Year - 2019

* As per CIO Review Magazine

Industries We Serve

HealthCare

IT & Software

Education

Banking & Insurance

Media & Entertainment

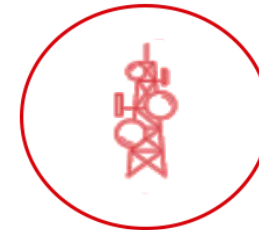

Travel & Hospitality

Retail & eCommerce

Manufacturing

Telecom

Our DNA

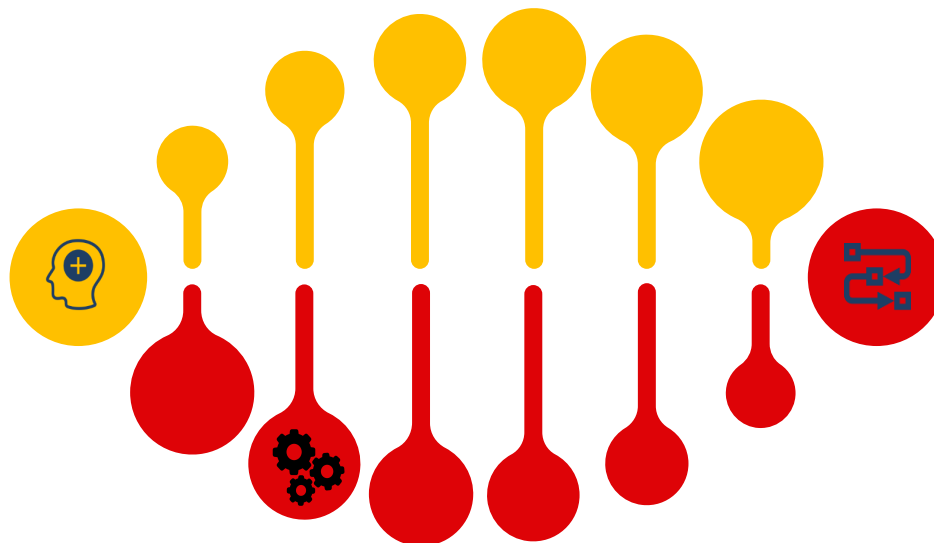

The Right Attitude

Our team works as an extension of your team. All FourBrick teams are encouraged to work as an extension of the client and work on improving productivity and service delivery always.

The Right Process

Every customer is unique, so FourBrick will tailor the model according to your requirement and situation to deliver the best results.

The Right Technology

A judicious mix of technology (through research and prior experience) and human interface provides best of both worlds.

The Right Team

With the right mix of resources, the FourBrick team will have just the right level of experience to deliver the services required. They will be backed-up by the central team of experts.

Past Work Portfolio

IoT Solutions

- IoT - Content Delivery Platform
- IoT - Air Quality Control System
- IoT - LoRAWAN Cloud
- IoT - Sigfox Panic. Button
- IoT - Productivity Management
- IoT - Predictive maintenance
- IoT - HealthCare Device Monitoring Solution
- IoT - Soil Moisture

Financial Solutions - FinTech

- Spice Money – Mobile Solution
- Payment Gateway, Charging Gateway
- Lock – Screen
- Voice/Data Credit
- Express Voice/Data Credit
- Top-up & Digital Top-up
- Voice/Data Transfer
- Gifting
- Collect Call/SMS
- Reconciliation Solution

Mobile Voice and Messaging Solutions

- Active Call Manager
- Voicemail (VM) / Voice Call Completion
- Missed Call Alert (MCA)
- Reverse MCA
- cRBT
- Pre-Call Announcement
- USSD Gateway, USSD Browser, SMSC
- ODP, Self-Care, CMS
- i-EOCN
- Campaign Manager

Transportation

- Hotel Booking & Tracking
- Cab Booking & Tracking
- Bus Booking & Tracking
- Aggregator portal for bus booking

Enterprise Solutions

- IBD-OBD , Messaging – National-International
- Chatbot
- E-commerce, POS
- BTS Monitoring tool
- NEWS: Network Early Warning System
- Call Drop Detection System
- GRC: Governance Risk Compliance

Data Analytic Solutions

- IDM : Intelligent Data Info. Management
- Data Search
- Data Predictive Analytics : pVIEW
- Data Streamline & Sync
- DMS (Document Management System)

HealthCare Solutions

- S2T (Speech 2 Text) for HER
- SMART – ICU
- PACS

Specialization

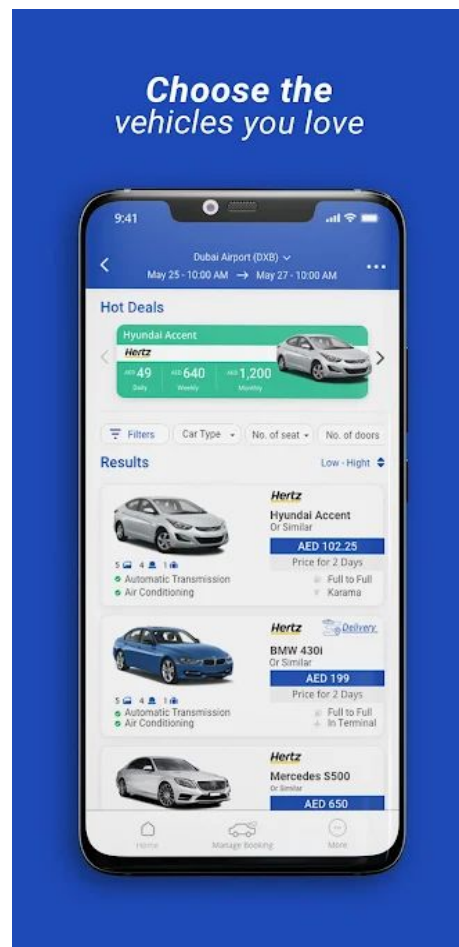

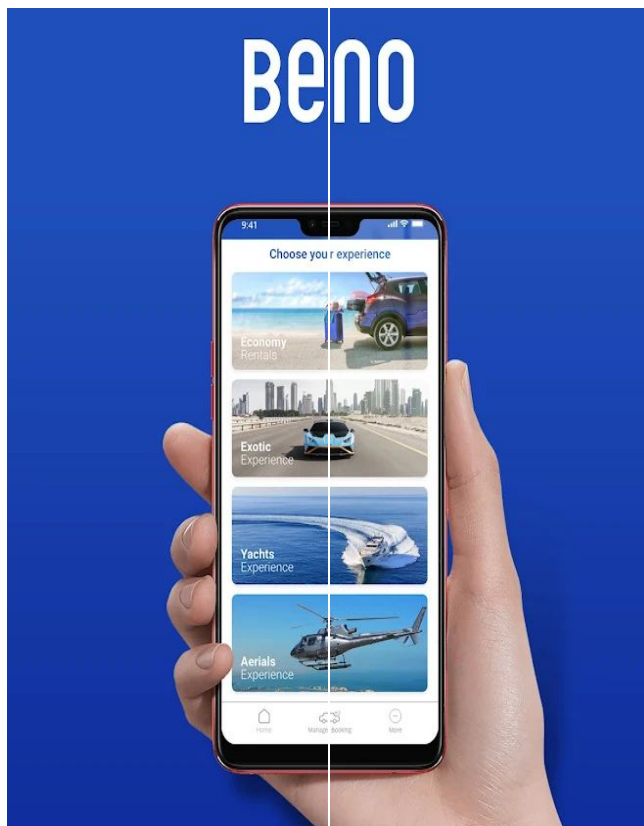

Our Work Sample

Beno - Vehicle Rental Hub

Beno provides a one-stop platform for everyone to browse, book, and experience a wide variety of vehicles, bringing together the worlds of cars, yachts, and aerials rental all on one platform!

It's the perfect companion for those who seek a unique luxury experience, or even a suitable rental car when needed!

Our platform provides you with thousands of listings from various car, yacht, and aerial rental vendors, allowing you to filter to the price, type, or even the vendor desired and secure your booking all on one portal! Our rental locations stem from Dubai, UAE to over 96+ countries!

HOW IT WORKS:

1. Choose the experience of your desire
2. Choose your pickup and drop off locations (skip to step 3 for experiences)
3. Choose the vehicle you desire
4. Add in your details
5. Check out and manage your bookings!

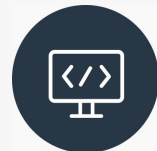

Joules Network (Ad-network)

Joules Network is a global ad exchange that provides monetizing solutions to publishers and advertisers through the power of real time bidding . Joules Network uses different channels –Display, Video and Native —both for desktop and mobile covering worldwide traffic to optimize and scale revenue.

Developed the complete solution including the android app, reporting web interface, real-time dashboard and interconnects to the advertisers.

Complete development and designing for Ad-Exchange and Bidding platform.

Archaeological Survey of India

ASI (Archaeological Survey of India), Delhi Circle application is designed to provide experience of monuments of Delhi on mobile. User can experience the monument , get information about it and create own itinerary before visiting it.

Searching the monuments and reading their history.

Feature to reach a particular destination i.e. Map Help

Planning Itinerary

Electronic Guide of Monuments

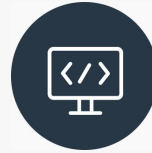

User can view the Image Gallery

Quixoo (Get Quick Solutions)

Social issues discussion online forum concerning human issues and questions related to Health, Education, Personal Issues, Career, Finance and many more!

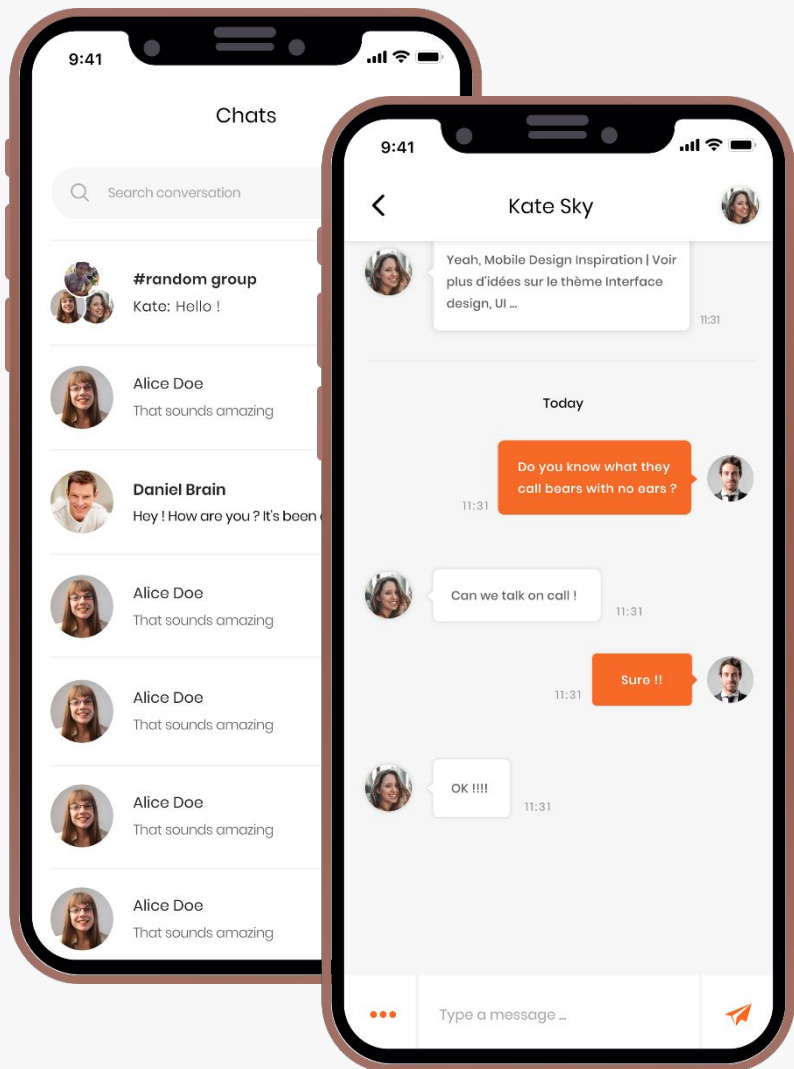

Complete development and designing.

Chat App

Instantly connect with the people in your life.

This is a free, fast, and secure. You can use names or phone numbers to find friends. Use everywhere. Our Chat app works across all mobile and desktop devices. You can even connect with people internationally!

UNLIMITED: You can send media and files, without any limits on their type and size. Your entire chat history will require no disk space on your device, and will be securely stored in the cloud for as long as you need it.

SECURE: We made it our mission to provide the best security combined with ease of use.

Communicate better with groups. Catch up in real time with high quality group video chat or customize your messaging experience with colors, nicknames, and group photos.

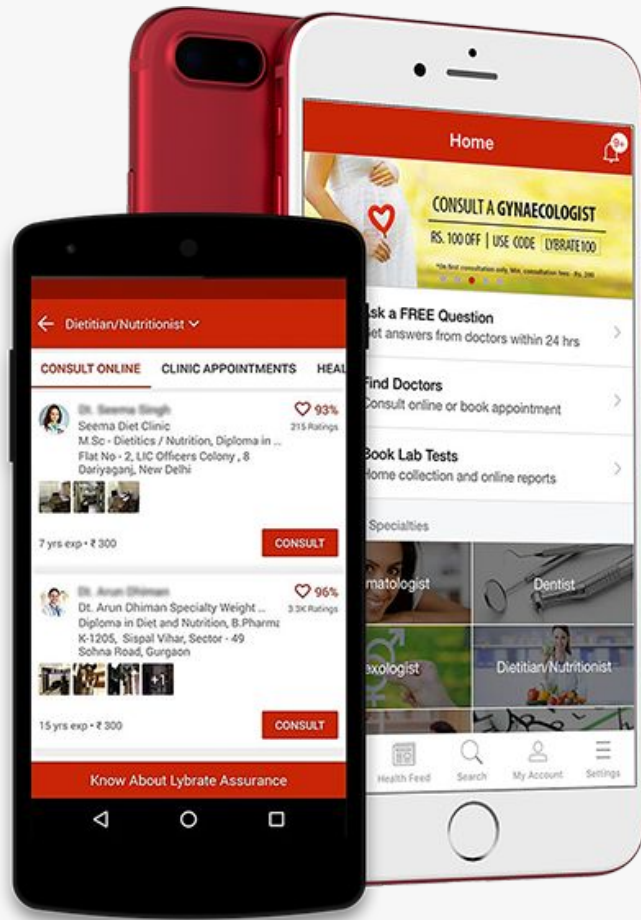

RELIABLE: Built to deliver your messages in the minimum bytes possible, App is the most reliable messaging system.

Lybrate – Consult a Doctor

iOS/Android App

Consult a Doctor is India's #1 Medical platform connecting over 10 million users to over 100,000 top Doctors and pathology labs. You can ask a FREE question about any health or fitness query and get multiple helpful answers from the best doctors within a few minutes. You can also find doctors across all major specialties and can either consult them online instantly or book an appointment to visit the clinic at your preferred time! Lybrate - Consult a Doctor has revolutionized the way people in India think about and take care of their health and fitness.

Consult Doctors Online

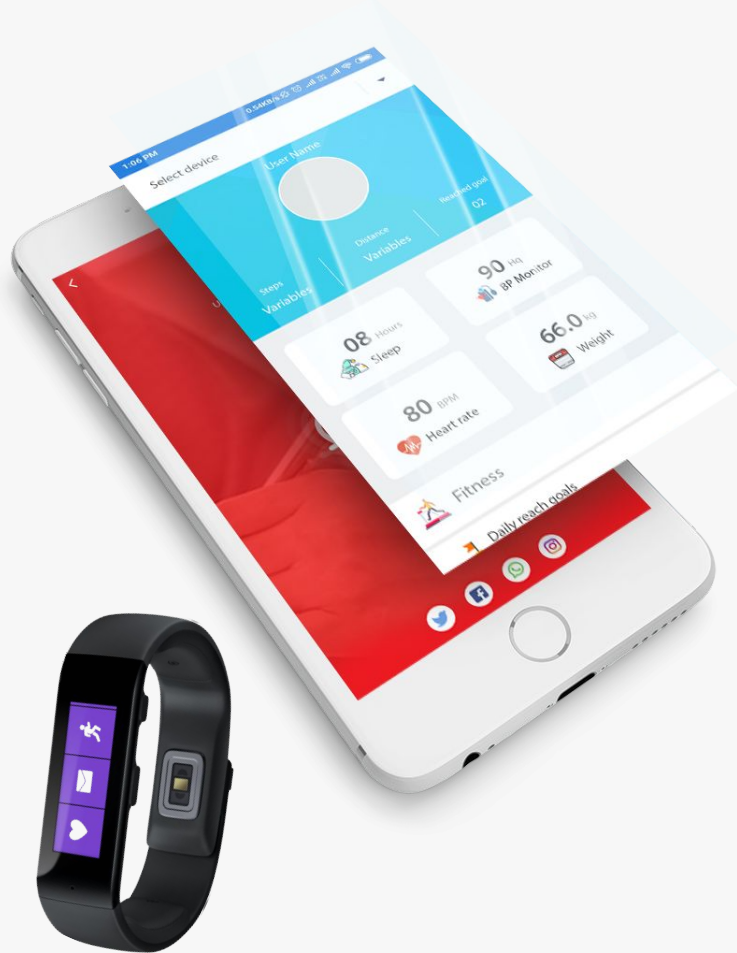

Manage Medical Records

Book Appointments with Doctors

Receive Health Tips

Fitness App (Wearables)

This app can track your exercises and analyse your sleep & activity data. It keeps you motivated while exercising, helps to build healthy lifestyle and makes a better you.

Working with multiple smart devices

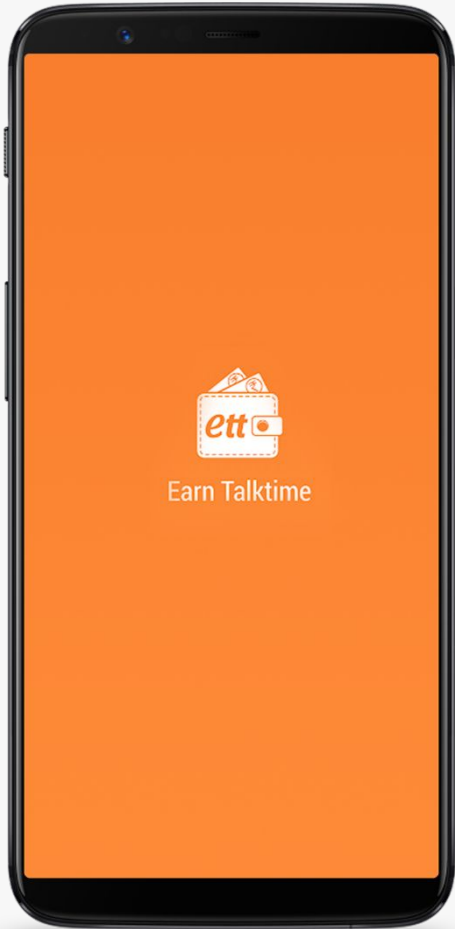

Personalized sleep assistant

Tracking every workout accurately

Measuring your fitness.

Earn Talktime

India's foremost ad funded wallet with millions of downloads providing a platform to advertisers for app promotion and retention.

Completely developed on AWS Infrastructure

Built in-app Usage and Retention campaigns

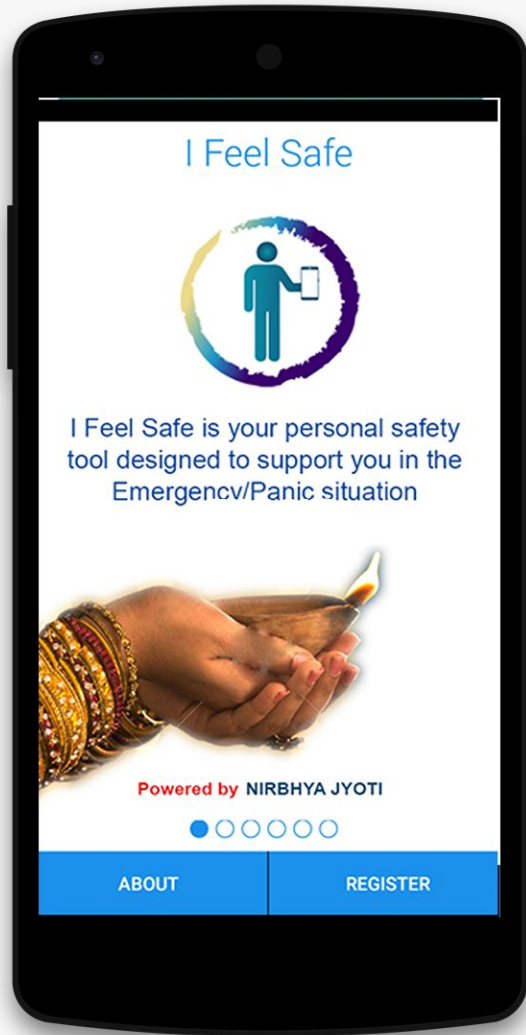

Uses google notifications and email for promotional campaigns

Integrated with Talktime recharge and OTP verification vendors

Integrated with advertiser SDK, Facebook SDK, Google Services and Google Analytics SDK

I Feel Safe

I FEEL SAFE is a map based mobile application for women safety. With I FEEL SAFE application you can send instant emergency alert to your friend, family & police by just pressing the power button of your phone 5 times.

Implemented feature to add the contacts that we wish to intimate at the time of emergency.

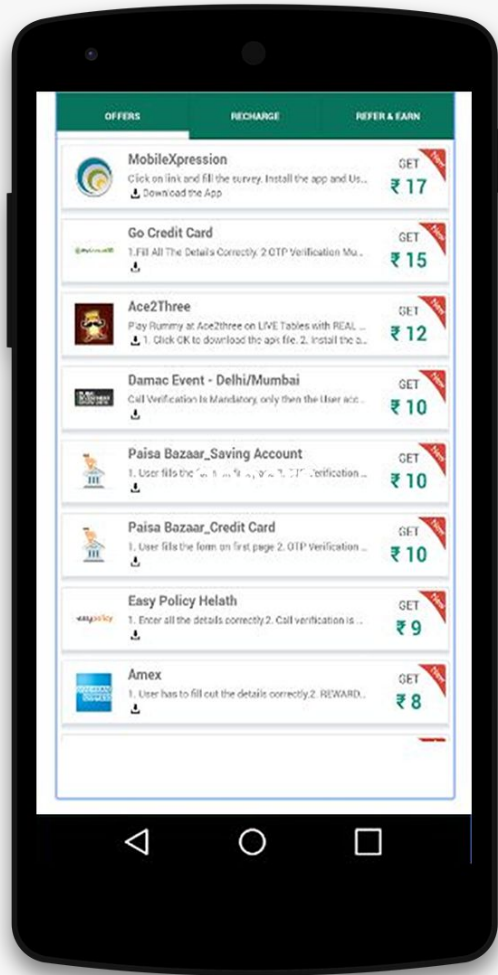

Once power button is placed 5 times, an alert is send in the form of SMS to all the emergency contacts every 30 secs within your location.

An automatic call is also placed to police in emergency even when the phone is locked

CashOn

CashOn is a one stop solution for free talktime by downloading apps. CashOn rewards users with great payouts for every task. Be it app downloads, referrals and registrations, this free recharge app never runs out of deals

Developed the complete solution including the reporting web interface, real-time dashboard and interconnects to the advertisers.

Supported both api based and pixel based callback models

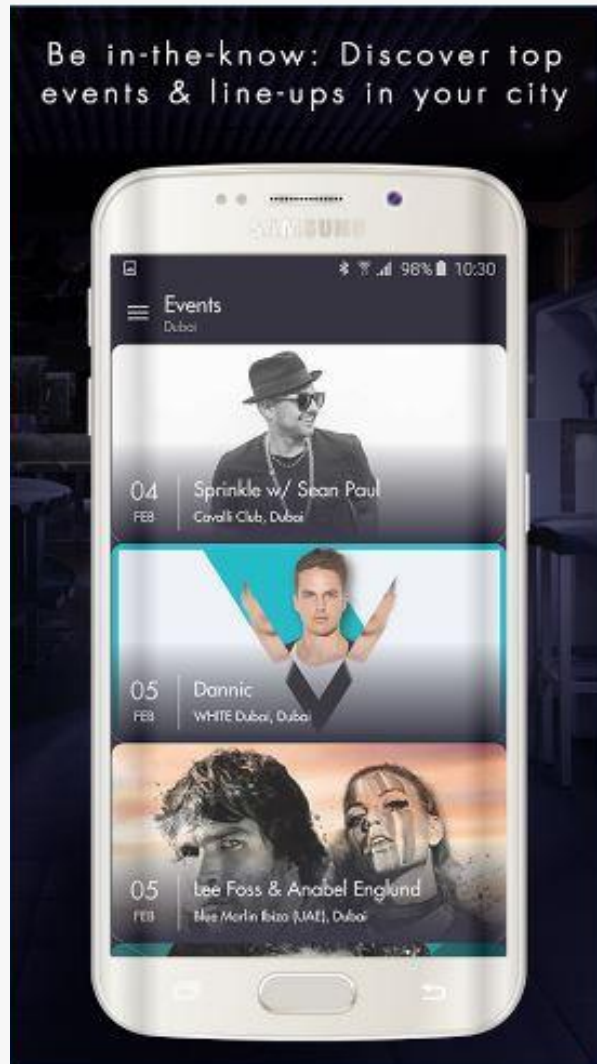

Completely developed on AWS Infrastructure

Built in-app Usage and Retention campaigns

Integrated with Talktime recharge and OTP verification vendors

Exclusive Tables

Exclusive Tables is a preferred way of gaining access to a handpicked list of top nightclubs, parties and restaurant-lounges in your city, right from the palm of your hand.

Currently available in Dubai, Barcelona and Ibiza.

Viewing curated venues and events so you can be sure you discover the hottest place to be in your city, daily

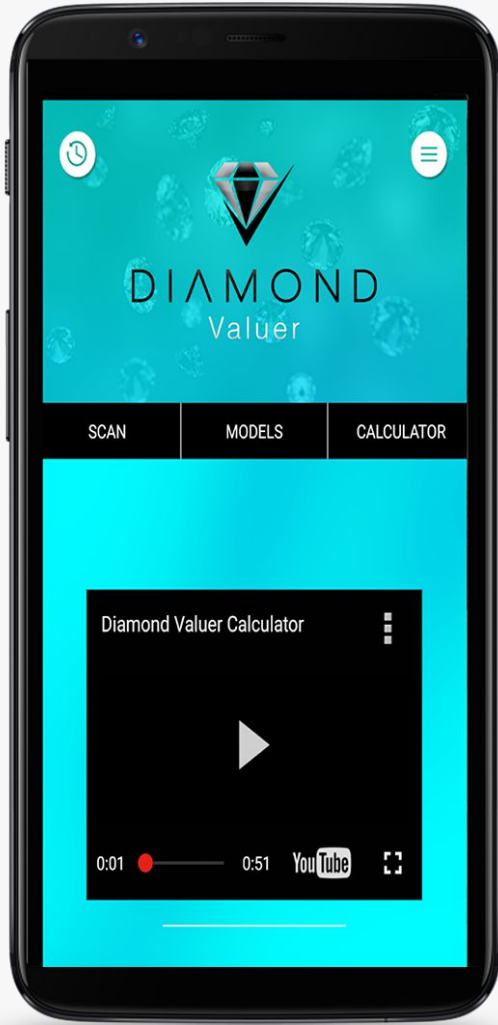

Hassle-free pricing inquiry: View tables, packages, tickets and their prices without having to call anyone.

Making a booking request directly through the app User can receive confirmations, update, cancel and view all your upcoming and pending bookings in the app.

Go cashless: Implemented “pay and combine billing” with friends at a selection of our participating partner venues

Diamond Valuer

The Diamond Valuer Calculator will give you an approximate figure of what your diamond ring will be valued, for insurance purposes, which is generally the accepted method of determining the value of jewellery pieces. Calculator is based on the current price of the gold on the market and the price of diamonds provided by the main resources in the industry

The App also allows you scan your ring and compare it to similar or same items in our database. This option is specifically designed for people who buy a lot of rings and want a quick estimate.

Working with multiple smart devices

Personalized sleep assistant

Tracking every workout accurately

Measuring your fitness.

Wallet Play

Wallet Play is a Brain Game. Unique new concept of Clue text with pictures! Awesome feature of presenting meaning of a word in both text & image format. Fun way of learning words

4 Pics 1 Word : Introduced theme of guessing one word common in Four pictures

Word Play : Developed a unique new riddle of guessing word common in a Clue text & picture.

Word Of Day : Guessing of a word with the help of hints

Ministry of Commerce & Industry

Provides detailed information on the Saudi factories, and can search for the plant by name, products or industrial activities, and is the most prominent features of the application.

Introduced easy access to information devices.

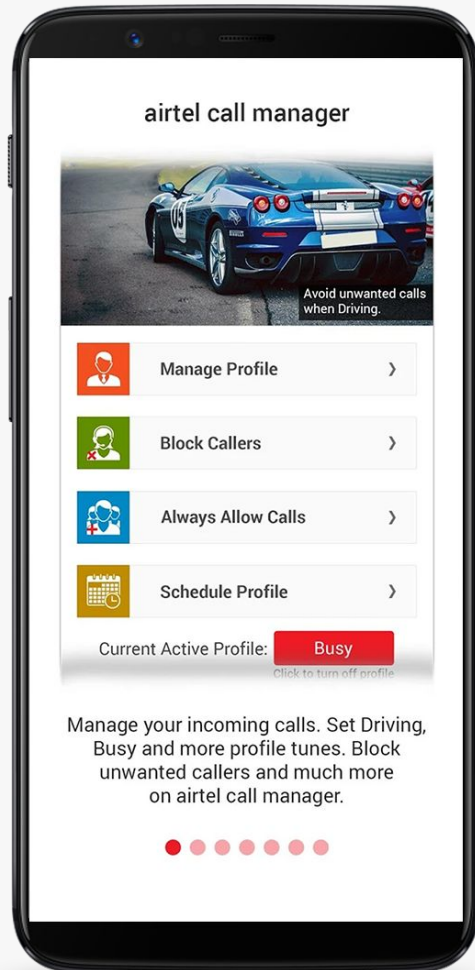

Developed access to plant data and contact information , or access it directly by the factory coordinates linking with Google Maps

Implemented possibility of adding a favourite list of factories or even the participation of factory information in social networking sites directly

Also implemented the possibility of identifying emerging factories in the Kingdom & updating factories to their data directly through the website of the Ministry of Trade and Industry.

Airtel Call Manager

Airtel Call Manager manages your calls with your current status i.e. Driving, On Holiday, In Meeting, On Leave, etc. the callers will hear the profile announcement and you will receive Blocked Call SMS alert.

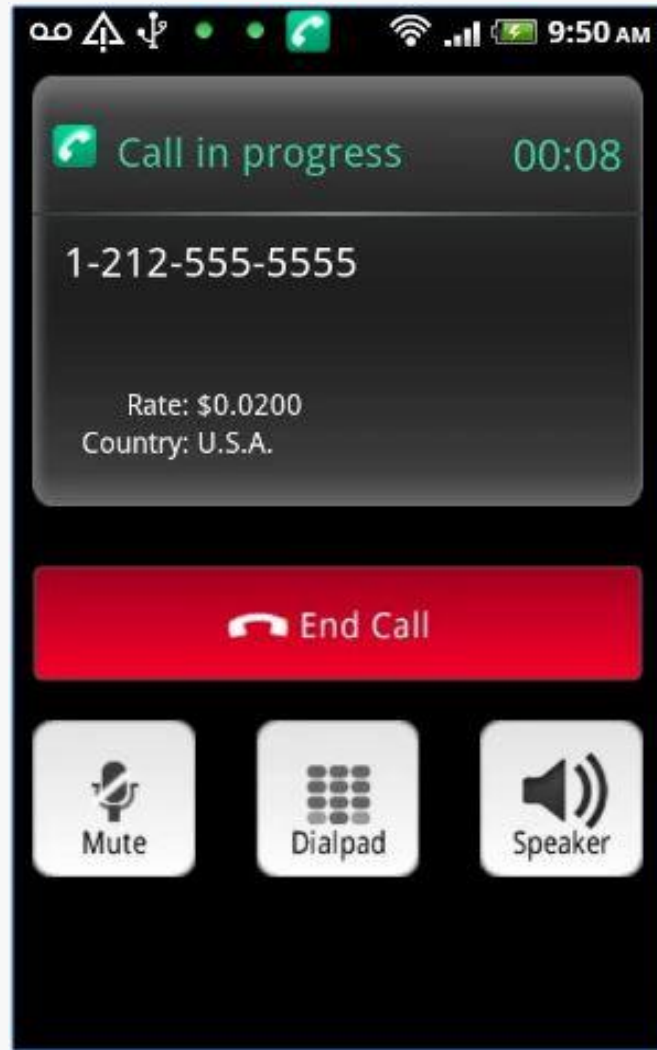

Managed Profiles - User can set and change any profile like Meeting/ Driving/ Not Available/ Busy and more at any time.

Blocked Callers- User can block the unwanted numbers to the list from which they do not want to receive the calls. ACM subscriber will receive the Blocked Call SMS alert. .

Scheduled Profiles- ACM Subscriber can schedule the profiles well in advance.

MobeeFree Pro

MobeeFree Pro is a mobile application that lets you make affordable, high quality VoIP calls from your Phone. It's the most user friendly and high quality international phone application available for calling India, Pakistan, Bangladesh, Nepal and Sri Lanka, among other countries.

Connects to Internet using Wi-Fi, GPRS, EDGE or UMTS

Feature to select regular contacts from your Android contact list

Providing detailed call information

Feature to recharge your account direct from your phone

Sending SMS from the app

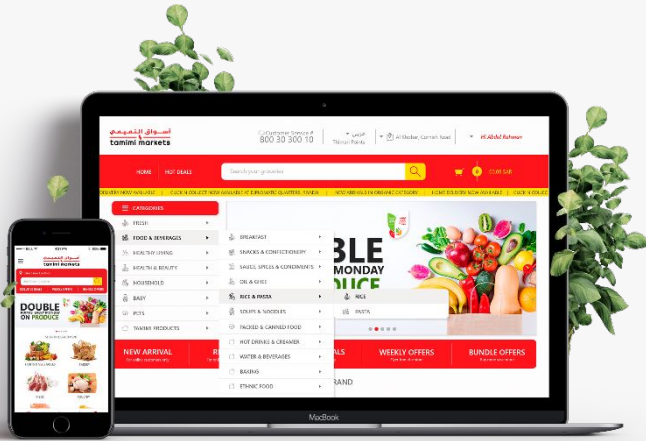

Customizing your caller ID

Tamimi Markets

Tamimi Market is one of the fastest-growing supermarket chains in Saudi Arabia, and Saudi shoppers named Tamimi Markets a Top 100 Saudi Brand for 5 years. Our vision is to be the best supermarket in the kingdom, with a focus on customer service, quality, freshness, variety and everyday low prices.

Browse our wide selection of fresh products.

Add to cart your favourite ones.

Select your collection time and location and proceed to checkout.

What we do in IoT ?

We are a team of passionate technocrats having expertise in:

Design and development of Internet of things based products and solutions.

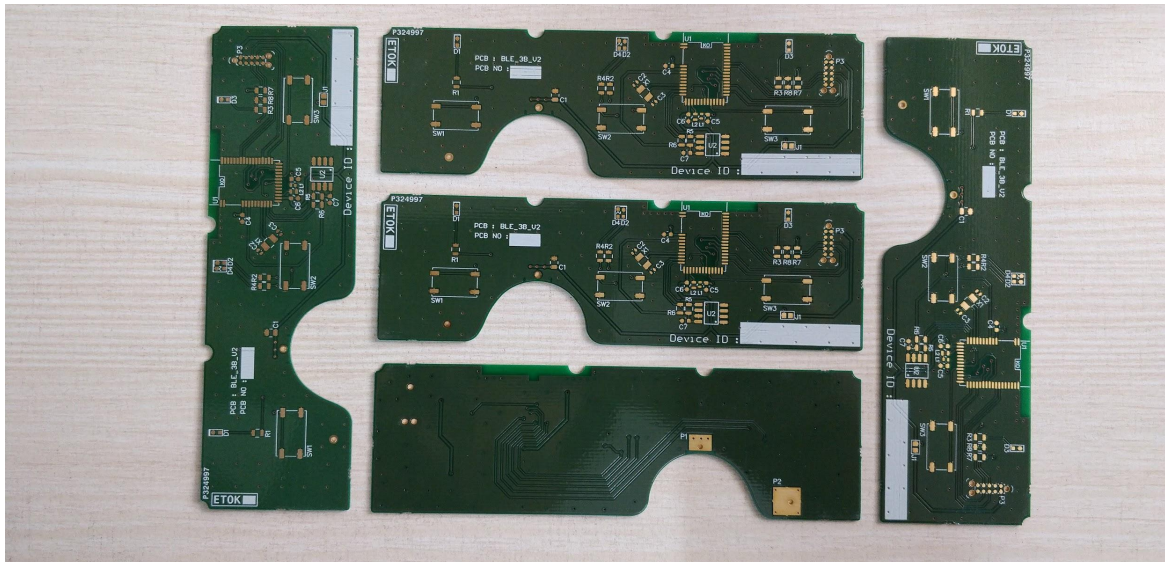

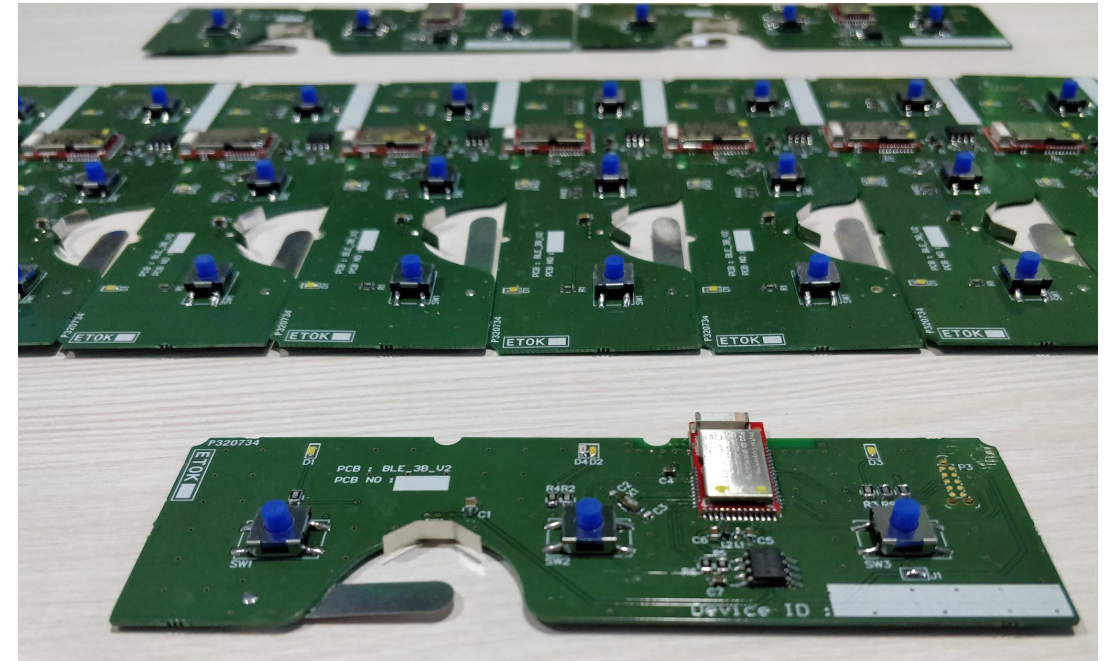

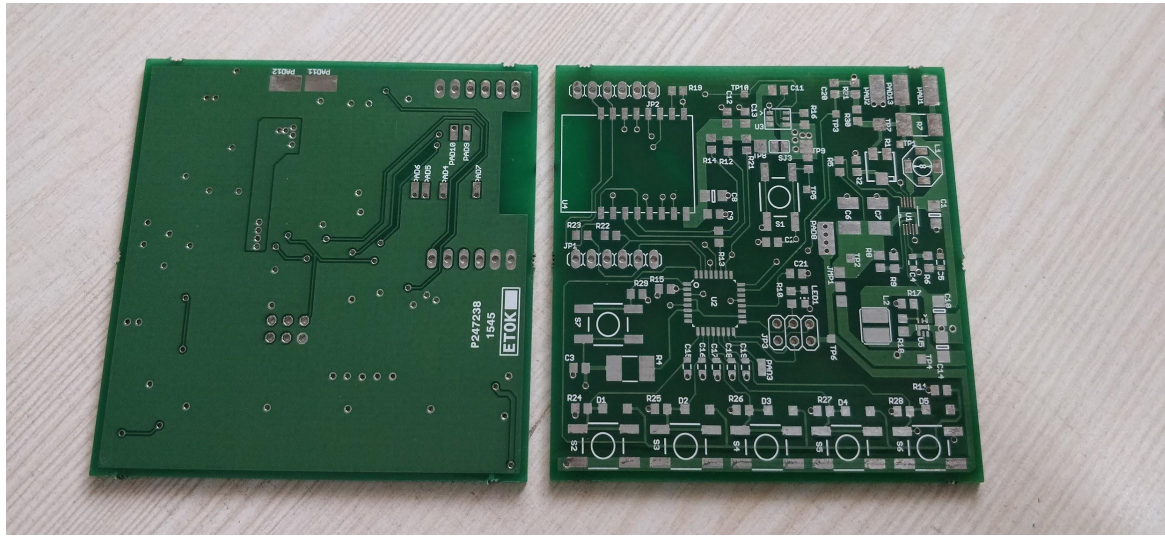

Our team can be categorized in four different domains:

- Firmware (Design & Development)
- Hardware (Design, development & prototyping)
- Software and Mobile Application
- Cloud services for IoT (www.iotclouds.co)

Our Approach is structured around the emergence of an IoT ecosystem which has given rise to an asset value chain comprising of connections of things, data, process and people.

Hardware

Custom hardware from design to prototype to production ready!

Internet of Things

Internet of Things (IoT) is an ecosystem of connected physical objects that are accessible through the internet. The 'thing' in IoT could be a person with a heart monitor or an automobile with built-in-sensors, i.e. objects that have been assigned an IP address and have the ability to collect and transfer data over a network without manual assistance or intervention. The embedded technology in the objects helps them to interact with internal states or the external environment, which in turn affects the decisions taken.

Internet of things is changing the way organisations work by tracking, collecting data and analysing processes to improve and optimise & reduce cost and time.

Internet of things is transforming and influencing many sectors such as

Agriculture

Energy

Supply Chain

Health Care

IoT Applications

Organisations waste a lot of money on electricity bills. IoT solutions could help reducing electricity bill by monitoring room occupancy and turning off unused resources.

IoT enabled smart products and spaces are promised to save time, energy and money.

- **Smart City**
- **Smart Home**
- **Smart Monitoring**
- **Smart Traffic**
- **Smart Agriculture**
- **Smart Air Quality**
- **Smart Construction**
- **Smart Shopping**
- **Smart Transportation**

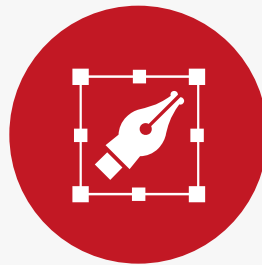

Process

Idea

To analyze the requirement through in-depth research with the help of brilliant tools.

Sketch

To draft the design that is related to the research in order to check the feasibility.

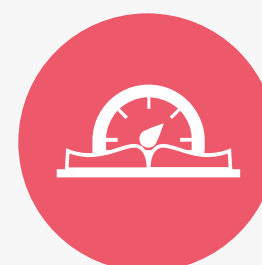

Design

After completing feasibility test, a final design is prepared by using smart tools.

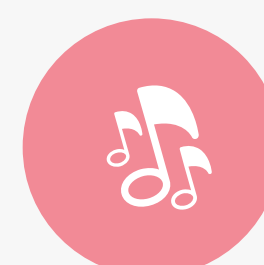

Develop

Now, our the development team starts developing the solution according to design.

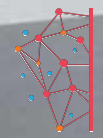

Test

In testing phase, we test every component to make sure that our solution fits the requirement.

Celebrate

We make delivery for the solution and assist our clients to control and administer solution.
